

# ENHANCED PRIMARY CARE DEVELOPMENT PLAN

## Why is it here?

Lion Health has successfully applied to be involved in this 6 month programme along with 8 other practices in the area.

## What's the aim?

The project will enable the practice to target key areas to improve, and support us to develop the skills to make and maintain positive changes for staff and patients.

## Who is involved?

To steer the project we have formed a '**Core Project Group**' with representatives from each department which should allow decisions to be made considering every viewpoint. Dr Woolley, Dr Wilson and Dr Kerr along with some members of the management team, reception and admin staff will form the project group. A patient will also be present from our Patient Participation Group.

## What's next?

The group will use data from questionnaires, departmental input and the PGP data collected in 2014 to underpin the project and draw key areas for improvement. Staff and patients have been asked to participate in surveys and this will be presented at our **Staff and Patient Engagement Event at Lion Health on Thursday 9th July.**

**As the project progresses, we will keep patients informed by putting regular updates on the TV screen, our Facebook page and our website;**
